Subject: Regarding condition in participation in Rabi Procurement

Respected Uncleji..

Greetings of the day!! Hope U are keeping in good health.

I am writing this mail in reference to the OSCSC letter no 8409- dtd 22/04/2015 regarding participation condition in Rabi procurement.

The first and second condition is well understood by logic. However the third condition stipulates that Millers who have participated in Cross district Procurement are supposed to deliver 100% of CMR within 15th May 2015. We have participated in Subarnapur District procurement and have procured 20000 Qtl of paddy. But delivery of rice could start only day before yesterday due to delay in issue of contract no by FCI. Since out of district CMR is also supposed to be delivered at home district there is always a space constraint at RRC. And RRC delivery cannot start without start of delivery in FCI.

This condition of 100% out of district delivery is according to my understanding cannot be termed without prejudice. When neither the home district delivery nor the procurement district delivery is 100% it is practically difficult to deliver 100% of CMR within 15th May 2015. Corporation should also understand that procurement opportunity was given to out of district millers to solve the problems of Surplus districts. Now I feel penalized by participating in the other district operation. My home district percentage will exceed 75% but now it is practically very difficult to complete 100% delivery of Subarnapur CMR before 15th May. That would have been possible if the CMR is getting delivered at Subarnapur.

I wish to know your viewpoints regarding this. If we can pursue to change the "100% condition" to "the district average percentage of the home district or procurement district which ever is higher", I think that would be a logical condition. Please give your take on this. waiting for your reply...
