Dated 3rd January,2012.

To,
The Member Secretary,
State Pollution Control Board, Odisha,
Paribesh Bhawan,
A/118, Nilkantha Nagar, Unit-VIII,
Bhubaneswar-751012.

Dear Sir,

Sub: Requirement and process of ETP in Boiled Rice Mills.

We wish you a Very Happy New Year and thank you for giving us an appointment to discuss various issues as regards the requirement and type of effluent treatment in Boiled Rice Mills who have or do not have sufficient land in the mill area.

We understand that the effluent treatment can be possible through various settling tanks with lime dosing, screening of solid suspended materials and grease/oil separation system if sufficient land is available without necessitating installation of mechanized ETP system which requires extensive recurring operational expenses in addition to higher cost of Plant and Machinery.

We submit a rough sketch of the system for your kind perusal and technical modification as you may think fit to make it effective. Sir, you are quite technically competent enough to suggest a suitable model version and your help is earnestly requested.

We therefore, request your honour to kindly suggest a "Suitable Model" with drawing that can be adopted by rice mills having sufficient land available with them for immediate compliance and oblige.

Yours faithfully,

Sd/-.

(Santosh Kr. Agrawal),
Secretary.
